

Serial No.: 09/760,874

plastic material, having a transport device for the plate to be printed on and having an electrostatic or electrographic printing device arranged above the transport device, the improvement comprising:

*B1
concl'd*

a conveying unit (2) feeding the paper or the plate-shaped material with respect to the electrostatic or electrographic printing device (EDE), a centering unit (3) fixing a position of the paper or the plate-shaped material with respect to the electrostatic or electrographic printing device (EDE), and the conveying unit (2) integrated with the centering unit (3) to form the transport device acting with the electrostatic or electrographic printing device (EDE).

There is no additional fee for this Amendment because the total number of claims and the total number of independent claims remain unchanged.

REMARKS

Applicants kindly request reconsideration of this Patent Application, particularly in view of the above Supplemental Amendment and the following remarks.
